HOW TO WRITE A PROMPT

Step-by-Step Explanation with Proper Examples

Step 1: Define the Objective

Before writing a prompt, clearly determine the objective (goal or purpose).

Why this matters:
A clearly defined objective leads to accurate, relevant, and focused output.

Synonyms:

- Objective → Goal, Purpose, Intention, Aim

Example

Objective: **Explain the concept of Artificial Intelligence for beginners in simple language.** **Purpose:** **This content will be used in an introductory academic book..**

Step 2: Assign a Role

Assigning a role tells the AI **from which perspective it should respond**.

Synonyms:

- Role → Persona, Function, Position

Example

Role: **You are an experienced professor specializing in Artificial Intelligence** **and known for explaining complex ideas in a simple manner.**

Step 3: Provide Context

Context supplies **background information** that helps the AI tailor its response.

Synonyms:

- Context → Background, Situation, Setting, Scenario

Example

Context:

- Audience: First-year undergraduate students

- Knowledge level: Beginner

- Usage: Educational textbook- Knowledge level: Beginner

- Usage: Educational textbook

Step 4: Specify Instructions

Instructions define **how the task should be performed**.

Synonyms:

- Instructions → Guidelines, Directions, Rules, Constraints

Example

Instructions:

- Use clear and simple English

- Avoid technical terminology

- Include one real-life example

- Maintain an academic yet friendly tone

Step 5: Set Constraints

Constraints limit or control the output to match requirements.

Synonyms:

- Constraints → Limitations, Boundaries, Conditions

Example

Constraints:

- Word limit: 200–250 words

- No formulas or code

Step 6: Decide the Output Format

Output format defines the **structure and presentation** of the response.

Synonyms:

- Output format → Structure, Layout, Presentation style

Example

Output Format: **- Introduction paragraph** **- Concept explanation** **- Real-life example** **- Advantages (bullet points)**

Complete Example of a Well-Written Prompt

Role:

You are an experienced professor of Artificial Intelligence.

Objective:

Explain the concept of Artificial Intelligence.

Context:

- Target audience: Beginner-level undergraduate students

- Purpose: Introductory chapter of an academic book

Instructions:

- Use simple and formal English

- Maintain a clear and instructional tone

Constraints:

- Length: 200–250 words

Output Format:

- Introduction

- Explanation of the concept

How to Write a Prompt for Content Writing

Step-Wise Explanation with Example

Step 1: Decide the Purpose of the Content

Explanation:
First, clearly decide what type of content you want—for example, a blog, article, social media post, or essay. The purpose helps the AI understand the writing goal.

Example (Prompt Part):

Task:

Write a blog article explaining Artificial Intelligence.

Step 2: Define the Target Audience

Explanation:
The quality of content depends on **who will read it**. Beginner content is different from professional content.

Example (Prompt Part):

Audience:

Beginner-level readers with no technical background

Step 3: Assign a Role to the Writer (AI)

Explanation:
Assigning a role ensures the content has the right tone and expertise.

Example (Prompt Part):

Role:

You are a professional content writer who specializes in explaining technical topics in a simple and engaging way.

Step 4: Provide Context and Topic Details

Explanation:
Context explains **where and how the content will be used**, improving relevance.

Example (Prompt Part):

Context:

This article will be published on an educational blog aimed at students and beginners.

Step 5: Give Clear Writing Instructions

Explanation:
Instructions control the style, language, and structure of the content.

Example (Prompt Part):

Writing Instructions:

- Use simple and clear English

- Avoid technical jargon

- Use short paragraphs

- Add one real-life example

- Maintain an informative and friendly tone

Step 6: Set Constraints (Word Limit, Tone, Style)

Explanation:
Constraints prevent the content from becoming too long or unfocused.

Example (Prompt Part):

Constraints:

- Word limit: 500–600 words

- Tone: Informative and beginner-friendly

Step 7: Specify the Output Format

Explanation:
Output format ensures the content is well-structured and easy to read.

Example (Prompt Part):

Output Format:

- Title

- Introduction

- Main explanation

- Real-life example

- Conclusion

Complete Step-Wise Content Writing Prompt (Final Example)

Role:

You are a professional content writer experienced in educational writing.

Task:

Write a blog article explaining the concept of Artificial Intelligence.

Audience:

Beginner-level readers with no technical background

Writing Instructions:

- Use simple and easy-to-understand English

- Avoid technical terms and complex explanations

- Use short paragraphs for clarity

- Include one real-life example to improve understanding

- Maintain an informative and friendly tone

Constraints:

- Word limit: 500–600 words

Output Format:

- Title

- Introduction

- Explanation of Artificial Intelligence

- Real-life example

- Conclusion

How to Write a Prompt for Fashion Content

Step-Wise Explanation with Examples and Synonyms

Step 1: Define the Fashion Objective

Explanation:
First, clearly decide **what fashion-related content you want**—such as outfit ideas, styling tips, trend analysis, or product description.

Synonyms:

- Objective → Goal, Purpose, Aim, Intention

Example (Prompt Part)

Objective: **Create fashion content that explains modern casual outfit styling for young adults**.

Step 2: Identify the Target Audience

Explanation:
Fashion content changes according to **age group, gender, lifestyle, and occasion**.

Synonyms:

- Audience → Target group, Readers, Viewers, Consumers

Example (Prompt Part)

Target Audience: **College students and young professionals interested in casual fashion.**

Step 3: Assign a Fashion Role

Explanation:
Assigning a role helps maintain **professional tone and fashion expertise**.

Synonyms:

- Role → Persona, Profession, Identity

Example (Prompt Part)

Role:

You are a professional fashion stylist and content creator

with experience in modern fashion trends.

Step 4: Provide Fashion Context

Explanation:
Context explains **where and how the fashion content will be used**—blog, catalog, social media, or magazine.

Synonyms:

- Context → Background, Setting, Scenario, Situation

Example (Prompt Part)

Fashion Context:

This content will be published in an online fashion blog

focused on everyday wearable styles.

Step 5: Give Styling Instructions

Explanation:
Instructions guide **style, tone, and presentation** of the content.

Synonyms:

- Instructions → Guidelines, Directions, Rules

Example (Prompt Part)

Styling Instructions:

- Use simple and elegant language

- Explain styling tips clearly

- Focus on comfort and trend balance

- Maintain a professional and informative tone

Step 6: Set Fashion Constraints

Explanation:
Constraints help control **length, detail, and clarity**.

Synonyms:

- Constraints → Limitations, Conditions, Boundaries

Example (Prompt Part)

Constraints: **- Word limit: 300–350 words** **- Avoid technical fashion terminology**

Step 7: Decide the Content Output Format

Explanation:
Output format ensures the fashion content is **well-structured and visually clear**.

Synonyms:

- Output format → Structure, Layout, Presentation style

Example (Prompt Part)

Output Format: **- Introduction** **- Outfit description** **- Styling tips** **- Color and fabric suggestions** **- Conclusion**

Complete Fashion Prompt (Final Example with Synonyms

Role:

You are a professional fashion stylist and fashion content writer.

Objective:

Create fashion content explaining casual outfit styling for young adults.

Target Audience:

College students and young professionals interested in modern fashion.

Fashion Context:

This content will be used for an online fashion blog

focused on everyday wearable styles.

Styling Instructions:

- Use clear and elegant English

- Explain outfit combinations in simple terms

- Focus on comfort, trend, and practicality

- Maintain a professional and informative tone

Constraints:

- Length: 300–350 words

- Avoid complex fashion terminology

Output Format:

- Introduction

- Outfit styling explanation

- Practical styling tips

- Fabric and color suggestions

- Conclusion

How to Write a Video Generation Prompt (CGI and Cinematic) – Step by Step

PART A: CGI VIDEO PROMPT (Step by Step)

Step 1: Mention the Video Type

Explanation:
Always start by clearly mentioning that the video is **CGI (computer-generated)**.
This tells the AI that everything should be digitally created.

Prompt Part:

Complete Fashion Prompt **(Final Example with Synonyms**

Step 2: Assign a Professional Role

Explanation:
Give the AI a role related to animation or CGI to improve visual quality.

Prompt Part:

Role: **You are a professional CGI and 3D animation designer.**

Step 3: Describe the Scene Clearly

Explanation:
Explain **what is happening in the scene**, including characters and environment.

Prompt Part:

Scene Description: **Create a CGI scene showing a futuristic city with tall buildings** **and flying vehicles.**

Step 4: Define Animation and Visual Style

Explanation:
Specify the animation quality, style, and level of detail.

Prompt Part:

Animation Style:

- High-quality 3D animation

- Smooth character and object movement

- Highly detailed environment

Step 5: Add Lighting and Mood

Explanation:
Lighting and mood help set the atmosphere of the video.

Prompt Part:

Lighting and Mood:

- Night-time setting

- Neon blue and purple lighting

- Futuristic and energetic mood

Step 6: Give Camera Instructions

Explanation:
Camera movement controls how the scene is shown.

Prompt Part:

Camera Instructions:

- Slow aerial camera movement

- Wide-angle shots to show the entire city

Step 7: Mention Duration

Explanation:
Always specify the length of the video clip.

Prompt Part:

Duration:

8–10 seconds

Final CGI Prompt (Complete)

Video Type:

CGI animated video

Role:

You are a professional CGI and 3D animation designer.

Scene Description:

Create a futuristic city with tall neon-lit skyscrapers

and flying cars moving smoothly between buildings.

Animation Style:

- High-quality 3D animation

- Smooth movement

- Detailed textures

Lighting and Mood:

- Night-time setting

- Neon blue and purple lights

- Futuristic atmosphere

Camera Instructions:

- Slow aerial camera movement

- Wide-angle city shots

Duration:

8–10 seconds

PART B: CINEMATIC VIDEO PROMPT (Step by Step)

Step 1: Mention the Video Type

Explanation:
Clearly state that the video should look cinematic, like a movie scene.

Prompt Part:

Video Type: **Cinematic video**

Step 2:

Assign a Film-Related Role

Explanation:
Assigning a role such as director or cinematographer improves realism.

Prompt Part:

Role: **You are a professional film director and cinematographer.**

Step 3: Describe the Scene in Detail

Explanation:
Cinematic videos need emotional and visual details.

Prompt Part:

Scene Description: **Create a cinematic scene of a person walking alone** **on a rainy street at night.**

Step 4: Define Camera Angles and Shots

Explanation:
Camera shots are very important for cinematic effect.

Prompt Part:

Camera Shots: **- Slow-motion walking shot** **- Close-up of footsteps on wet road** **- Medium shot from behind the person**

Step 5: Add Lighting and Mood

Explanation:
Lighting creates emotion and film-like atmosphere.

Prompt Part:

Lighting and Mood:

- Low lighting with warm street lamps

- Moody and emotional atmosphere

- Dramatic cinematic feel

Step 6: Specify Visual Style

Explanation:
This step controls realism and film quality.

Prompt Part:

Visual Style:

- Realistic textures

- Shallow depth of field

- Film-style color grading

Step 7: Mention Duration

Explanation:
Always define video length.

Prompt Part:

Duration:

6–8 seconds

Final Cinematic Prompt (Complete)

Video Type:

Cinematic video

Role:

You are a professional film director and cinematographer.

Scene Description:

Create a cinematic scene of a person walking alone

on a rainy street at night.

Camera Shots:

- Slow-motion walking shot

- Close-up of footsteps

- Medium shot from behind

Lighting and Mood:

- Low lighting with warm street lights

- Emotional and dramatic mood

Visual Style:

- Realistic textures

- Shallow depth of field

- Film-style color grading

Duration:

6–8 seconds
